FIELD CLINIC 2019

Strengthening BMP for high productivity

18 – 19 JULY 2019

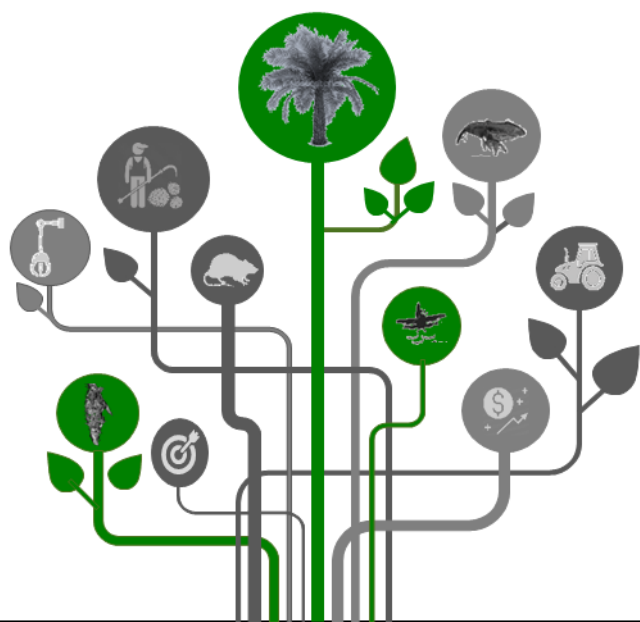

FELDA RESIDENCE HOTSPRING, SUNGKAI, PERAK MALAYSIA

# BACKGROUND

The oil palm remain vulnerable to pests and diseases which prevent normal healthy growth and cause significant yield reduction. Therefore, the effective and efficient management of pests and diseases is very important to ensure healthy growth at all stages for sustaining oil palm profitability. Besides pest and diseases, oil palm plantations are also experiencing a shortage of skilled and unskilled labour. Various approaches had been done to increase workers' productivity which include utilizing a wide range of mechanization technologies.

Hence, this field clinic will emphasize on strengthening the best management practices (BMP) in oil palm plantation.

# OBJECTIVES

- #01 To enhance knowledge**  
in best management practices (BMP) for sustainable oil palm agronomy.
- #02 To deliberate information**  
on the current research findings and sustainable technology in relation to oil palm productivity.
- #03 Hands on training**  
in managing and controlling P&D and fruitset problem of oil palm plantation.

## WHO SHOULD ATTEND

Agronomists, researchers, scientists, planters, field managers, academicians, science and engineering sectors, students and individuals that interested in oil palm industry.
