For a hundred years, The Incorporated Society of Planters (ISP) has advanced the professional interests of the Malayan and Malaysian planter. From humble beginnings in the hearts of three planters meeting in a bungalow in Kajang, the ISP grew quickly into a professional association whose fate has been bound closely to the country it calls home.

The Planters' Centenary is a book that traces the 100 years that have made ISP what it is today, through agricultural evolutions, political developments and economic journeys. It is also a salute to all those who have been a part of its story. With engaging narrative and nostalgic photos, this is a book that you will be proud to have on your shelf.
