

**Incorporated
Society of
Planters (ISP)**

Expands Its Horizons to Nigeria

We are delighted to announce that the Incorporated Society of Planters (ISP) in Malaysia is expanding its reach into Nigeria. With a rich history from 1919, ISP has been pivotal in driving the plantation sector in Malaysia, a significant contributor to foreign earnings.

ISP's mission is to advance the knowledge, skills and welfare of planters worldwide through accredited professional certifications, training and career development programmes.

It encompasses the agronomy aspects of varied crops (Oil Palm, Rubber, Cocoa, Coconut, Cassava, etc), building sustainable communities and plantation development and management. This expansion reflects ISP's dedication to fostering growth and facilitating knowledge exchange in a Region renowned for its agricultural heritage.

On 19th September 2023, Mr. MR Chandran Nair and Mr. Sabre Salim, board members from ISP, along with Ms. Claudine Weerasena, Interim Secretary ISP Nigeria Chapter, met and received full support from Nigerian Ambassador to Malaysia, Dr. Hajara Ibrahim Salim, for the successful establishment of the Chapter.

Marking this milestone, an official launch event is positioned in early 2024 in Nigeria. The event will feature industry leaders from both Malaysia and Nigeria. Dr Shermal Perera will serve as the interim Chairman of the ISP Nigeria Chapter, with Mr. Fatai A. Afolabi as the interim Vice Chairman.
